

XM radio is the best thing to come along in years. I can now select a channel and listen to the entire program without losing the signal. I also like that i can listen to what i want, and not what some station manager thinks i need to hear. It's nice to know i can let my children listen to there favorite music without some rude dj making suggestive comments or using foul language that they shouldn't have to listen to.

XM radio is successful because it's what we want and don't mind paying for.

As a trucker, the weather reports and traffic reports are critical to me and the fellow motorist i share the road with. XM has simply filled a void that todays traveling society needed.

I strongly feel that it's my right to decide which radio system i use to supply me with music and information i need.

Therefore, I ask that you support my rights, and support XM radio.

Thank You.
